

Award Winning
Concrete Pools

Enjoy your
pool in days,
not months™

The fastest, easiest and highest quality concrete pools

Our patented, award-winning pre-cast plunge pools are the first of their kind, bringing the fastest, easiest, and highest quality concrete pool to the market.

By deconstructing, re-engineering and optimising the concrete pool building process, we've streamlined both production and on-site build times.

Customers love us because we deliver a sophisticated pool quickly and in a way that doesn't break the bank.

Builders love us because we provide a straightforward solution that allows them to deliver their projects on time and within budget.

Arena

Plungie Arena | Blue Lagoon ecoFinish

Our Arena is the most sophisticated, architecturally-designed, round concrete plunge pool in the world.

At 3.5m and featuring ample, arena-style bench space, this plunge pool is perfect for bringing people together.

Diameter	External 3500 mm	Internal 3200 mm
Height	External 1690 mm	Internal 1590 mm
Volume	9,150 L	
Dry Weight	7,000 Kg	
Bench Space	3.2m ²	

View online

Studio

Plungie Studio | Kona Coast ecoFinish

Baby brother to the Original, our Studio has been designed specifically for smaller spaces and is the perfect solution for inner-city living.

At 3.6m x 2.2m, the Studio delivers practicality by way of design with two metres worth of bench space.

Length	External 3600 mm	Internal 3420 mm
Width	External 2200 mm	Internal 2020 mm
Height	External 1690 mm	Internal 1590 mm
Volume	8,000 L	
Dry Weight	6,800 Kg	
Bench Space	2m ²

Enjoy your pool in days, not months.

Our pools are completely functional from manufacturing right through to transportation and installation.

We want your experience purchasing a Plungie to be as easy as possible, which is why they're supplied with pre-constructed fittings. To ensure on-site works are minimal, fast and cost-effective, the following inclusions are standard in every Plungie:

- Highly engineered concrete pool shell
- High-performance ecoFinish interior
- Spa electrics multi-coloured LED light
- Poolrite innoSkim skimmer box
- Technical designs and pre-engineered specifications for ease of building approvals
- Pre-plumbed and fitted filtration line provisions
- 10-year structural warranty

Take a look at our online gallery to view examples of our ecoFinish colours.

ecoFinish Interior Coating

Every Plungie comes with an internal high-performance thermo polymer coating — which is the fancy way of describing ecoFinish.

ecoFinish is a highly engineered form of powder coating that's heat-blasted onto the internal shell of the pool, forming a completely sealed, flexible, waterproof membrane that's both luxurious to the touch, and highly durable.

We also offer a waterline tile provision. This is a provision that can be made for the ecoFinish to stop at the bottom of the skimmer entry. This will allow you to apply a waterline tile to your pool once installed.

In addition to this we offer an alternative raw concrete internal finish, this is a great option if you are looking to tile your entire pool.

Inclusions

Add-ons

Our range of add-ons and extras are designed to take your Plungie to the next level. These must be selected when placing your order as they are custom inclusions within your pool shell.

Our current add-ons include:

- Ferrules - for glass balustrade fencing or doweling into your surrounds
- Spa Jets - to enhance your pool experience
- Waterline tile provision - allowing you to apply a waterline tile to your pool once installed
- Raw concrete internal finish - perfect for tiling
- Umbrella Holders - to create additional shade

We are constantly improving our pool design and exploring innovative add-ons and inclusions.

Reach out to us directly to enquire about the options available to further customise your pool.

Equipment

Your Plungie includes a skimmer box and standard plumbing ready to connect and go.

An equipment package including pump, chlorinator, and filter can be added to your order. While our heater and pool blankets are the perfect addition for year round swimming.

We have a range of packages to suit your needs including our:

- Base Equipment Package
- Eco Equipment Package
- Smart Eco Equipment Package

Add-ons and equipment

A process to get you swimming sooner

By taking what was once a product constructed on-site and turning it into a manufactured one, we've managed to streamline a process that would normally take up to 16 weeks.

As the provider, we can have your pool delivered with a lead time as little as two weeks – all you need to do is choose an install solution that suits you.

Our installation solutions give you total control over how quickly you can be swimming:

Bring Your Own Builder (BYOB)

Organising your own builder to install your Plungie is easy with our pre-engineered specification and installation instructions.

Connect them with us and we'll take the heavy lifting out of it.

Owner Builder

Skilled or handy around the home?
Or maybe you're a builder yourself.

You can utilise your know-how or trade qualifications to manage your own project as an owner builder.

1. Fall in love with Plungie

Falling in love with a Plungie is easy.

With a wide range of shapes and sizes, from our round Arena all the way through to the world's largest monolithic pre-cast swimming pool, the Max, there's a Plungie for every family and lifestyle.

2. Understand your project

At this stage you'll need to know the Plungie model you're after, the preferred location in your yard as well as the installation depth (in-ground, above-ground, semi above-ground) and understand the accessibility to your site.

3. Find your install solution

Your install solution will help you manage your project and while no two projects are exactly the same, every project involves:

- Site plan and building approvals
- Crane hire engagement
- Earthworks and base slab
- Plumb up of equipment and electrical
- Finishing of pools surrounds: fencing, decking, landscaping, etc.

4. Purchase your Plungie

You can purchase your Plungie directly from us or through your builder.

Our pools are manufactured here in Australia and delivered nationwide.

5. Lock in delivery date

With the fastest industry lead times, you'll be able to lock in your delivery date as quickly as two to three weeks from when you purchase your Plungie.

We provide you with lifting and installation guides to assist your crane hire company and builder with all the information they need prior to delivery.

6. Install and swim

Because of its pre-cast, pre-fabricated solution, the on-site works to install a Plungie are faster than any other pool solution on the market – so that you can be swimming sooner.

How big are our pools?

When you hear the phrase plunge pool, there's probably one word that comes to mind — small. However, a Plungie is not your average plunge pool. We've developed concrete swimming pools that are compact, yet spacious. We're all about maximising space, so have designed our pools with ample bench space and slimmer side walls to leave more room for swimming. With a range of versatile models, Plungie caters to families (and backyards) of all sizes. So, when it comes to pools, does size really matter? Let's dive in and find out.

Average pool size

Standard swimming pools are generally up to 9m x 4m in size, with a depth of around 1.7m. However, as homes get bigger and blocks get smaller, standard pools are becoming less viable. Plunge pools, on the other hand, help increase property and lifestyle value without sacrificing the entire backyard.

Benefits of a plunge pool

Gone are the days of choosing between a pool and a lawn for your yard. A plunge pool won't take up as much space in your backyard so you can create multiple outdoor living zones.

Although they may not be great for laps, plunge pools are perfect for relaxation and cooling down on a hot day. Because they're smaller, they're also easier to clean and require less energy to heat than traditional pools.

Our models

We provide four concrete pool models — the Arena, Studio, Original and Max.

Each pool has been designed with different spaces and uses in mind. Let's take a closer look at their dimensions so you can decide which Plungie would work best for your project.

- Arena (3.5m diameter)
- Studio (3.6m x 2.2m)
- Original (4.6m x 2.5m)
- Max (6m x 3m)

How deep is a Plungie?

The external shell height of every Plungie model is 1.69m, creating a water depth of roughly 1.5m. If you're considering installing a Plungie above ground, make a note of this shell height. It will come in handy when you're researching fencing guidelines for above-ground pools in your area.

Can I change the size?

Would you paint over the Mona Lisa? Of course not! All joking aside, it's not possible to increase or decrease the size of our pool models due to their pre-cast nature.

This is what helps us deliver affordable, high-quality pools in a short timeframe, so it won't be changing any time soon. Having set dimensions also makes it possible to get a quote for crane hire before you've purchased a Plungie. We've even created detailed lifting diagrams so you can get the ball rolling.

Is bigger actually better?

In our opinion, no.

A Plungie can provide you with the benefits of a traditional pool without compromising your backyard space.

Want to add more value to your current home?

Adding a Plungie is a quick and easy way to improve the lifestyle value of your home, or increase the value of your home to appeal to more buyers.

You can add a premium, concrete pool to your yard in a matter of days, not months. Quickly accelerate your home improvement journey and turn your yard into an outdoor entertainment space.

Looking to build a new home with a pool?

Getting your builder to install a Plungie to your site prior to any site works commencing is the fastest, easiest, and most cost-effective way to enjoy a pool.

Let your builder know you'd love a Plungie and we'll look after the rest.

Benefits of a concrete swimming pool

Concrete pools are strong, durable and affordable but that's just the tip of the iceberg — there's a whole host of other reasons why concrete's our material of choice at Plungie.

For starters, a concrete pool will save you time in the installation process and money throughout its lifetime. We've put together a list of the benefits of a concrete swimming pool to show why you should consider choosing one. With these perks, we're confident that you'll soon love concrete pools as much as we do!

Most durable pool finish

A swimming pool is a serious investment for any property, so it's important that it stands the test of time. In terms of durability, nothing quite competes with concrete. Unlike fibreglass pools, concrete pools are resistant to popping, fading and peeling over time. Concrete pools are also able to withstand harsher weather conditions and are resistant to water chemical deterioration. This gives you flexibility in the water you choose for your pool — whether it's chlorine, saltwater or magnesium mineral, a Plungie can handle it.

We're so confident of the quality of our pre-cast concrete pools, that every Plungie comes with a 10-year structural warranty. With the correct maintenance, however, a concrete pool can last a lifetime.

Thermal qualities of concrete

Concrete pools are better at maintaining a consistent water temperature for year-round use. Unlike fibreglass pools, concrete pools can absorb, store, and release heat from the atmosphere throughout the day, resulting in less temperature fluctuations and the ability to hold heat for longer periods. This keeps your water temperature more constant, so you'll have less of a shock when you dive in first thing in the morning.

Best pools for sloping blocks

Is there a space in your yard that you'd love to utilise, but don't know how? It could be the perfect spot for a concrete pool! Our pools are made from high-grade concrete, so can withstand more pressure than traditional pools (fibreglass can only sit approximately half a metre out of the ground). This means they can be installed on sloping and uneven sites with minimal excavation.

Concrete pool finishes

A concrete pool offers opportunities for customisation that simply aren't available with fibreglass pools.

You can personalise the interior coating of a Plungie with a choice of 6 ecoFinish colours or alternatively a raw concrete internal for on-site tiling.

You can also choose from a range of extras, including pool heaters and spa jets to take your concrete pool to the next level. Fencing ferrules can also be requested at the time of order to allow glass fencing to be attached directly to the shell.

Once you've chosen these features, it's time for your creativity to shine through in how you integrate the pool into your space.

You can add pool coping tiles and exterior tiles to your in-ground pool to help it tie in with your home and outdoor area. Semi-recessed and above-ground pool exteriors can be rendered, painted, clad or left with a raw concrete finish depending on what will align with your space.

This flexibility allows homeowners and builders to work together and create a concrete pool that fits seamlessly into the landscape and surrounds.

Easy pool installation

We understand that, in construction, time is money. That's why we developed a revolutionary production process that allows you to get a high-quality concrete pool in just days, not months.

You won't just save time in the production process with a pre-cast concrete pool — the installation will also be a breeze.
